Education

University of Waterloo — Waterloo, ON
Bachelor of Computer Science — Sep. 2023 – Jul. 2027

Courses: Operating Systems, Databases, Networks, Compilers, Algorithms, Data Structures, User Interfaces

Technical Skills

Languages: Python, C++, TypeScript, JavaScript, SQL, C#, Go
Technologies: Node.js, Azure, Express.js, macOS SDK, MCP, UCP, Svelte, Android SDK, .NET, OpenRPC, Linux, React, Appium

Experience

Nvidia — *Sept. 2026 – Dec. 2026*
Incoming Software Engineering Intern — Ground Truth signals — Santa Clara, CA

Confluent — *May 2026 – Aug. 2026*
Incoming Software Engineering Intern — Stream Governance — Toronto, ON

Microsoft — *Jan. 2026 – Apr. 2026*
Software Engineering Intern — Network Tokenization & Card Encryption Services — Redmond, WA

- Building Microsoft's UCP Payment Handler for Agentic Payments

Microsoft — *May 2025 – Jul. 2025*
Software Engineering Intern — Payment Instruments Management Service — *Redmond, WA*

- Drove development of a **.NET** incident investigation tool for the Payment services, accelerating triage of **200+** daily incidents and enhancing reliability of **50M+** daily payment transactions across Microsoft platforms
  - · Implemented a customized **RAG pipeline** using semantic search over a vector database of historical incident logs to retrieve relevant past investigation findings for new incidents and inform their troubleshooting
  - · Integrated **Azure OpenAI** with investigation data to infer root causes, suggest fixes, and uncover patterns
  - · Reduced manual triage time for engineers by about **33%**
- Eliminated daily manual monitoring of **100+** production error types across **200K+** daily logs by developing an **LLM-powered** tool that dynamically flags critical issues using historical failure trend analysis
  - · Integrated **Azure DevOps API** to auto-create tasks for each flagged prod error with reproduction queries

Maxon Computer — *May 2024 – Aug. 2024*
Software Engineering Intern — Central Maxon App Team — *Waterloo, ON*

- Extended a **C++** module to retrieve and manage system process info for Linux, macOS, and Windows
  - · Improved the stability of the Maxon App and led to a **10%** reduction in application slowdowns
- Introduced a new attribute to a **relational database** schema and API endpoints to capture service version
  - · Enhanced analytics reporting and analysis by enabling tracking of feature-related events per version
  - · Reduced analytics framework support tickets by **20%**, saving ≈ **$50,000** annually in operational costs
- Developed and integrated APIs to transmit licensing and trial status from the 10Duke payload to GUI
  - · Significantly improved real-time license management and user experience for **1.7M** users

Huawei Technologies — *May 2023 – Aug. 2023*
Software Engineering Intern — Web Engine Research — *Markham, ON*

- Owned development of cross-platform benchmark tool in **Node.js** for WebView performance on mobile
  - · Benefited **100+** developers in Web Engine R&D by providing a comprehensive report generation tool

Research

Distributed Systems Lab | Serverless Computing Storage (Advised by *Prof.Bernard Wong*)
Contributed to the implementation of a fast state storage system for Serverless functions

Leadership

Mentor & Speaker, *Women in Computer Science Club* | Community Representative & Advisor, *Computer Science Club* | Orientation Leader, *Math Faculty* | President, *Culture & Language Club* | Member, *Poker Studies Club*
